Back End & Database: PHP basics, MySQL, form handling, database connectivity
AI & Design: ChatGPT, Claude, Perplexity, Canva, AI-assisted content and workflow support
Marketing & Tools: Branding basics, Meta Ads, Google Ads, YouTube Ads, content planning, VS Code, GitHub, OBS Studio

SELECTED WEB PROJECTS

JESAN STEEL WORKS / SANKALP | jesansteelworks.com

• Business website for a steel-furniture brand, presenting product collections and clear contact options. Added a WhatsApp-based enquiry path to help customers ask about products.

SAHNEY PAGRI HOUSE | sahneypagrihouse.com

• Mobile-friendly website for a turban and wedding-accessory retailer, organizing pagri, safa and groom-accessory collections with wedding-focused content and WhatsApp enquiries.

CROWN DETAIL HUB | crowndetailhub.ca

• Website for a Canadian car-detailing business, presenting detailing services and packages, including interior/exterior detailing, paint correction and ceramic coating, with booking and contact calls to action.

CLOTHCROWN - E-COMMERCE PROJECT

• Built responsive e-commerce pages and forms, with user-friendly navigation and basic PHP/MySQL database concepts. Used AI tools to assist content planning and page structure.

TRUCK HUB SALES | truckhubsales.ca

• Developed a mobile-friendly truck and trailer catalog with vehicle photos and specifications. Refined responsive layouts and prepared website files for GoDaddy hosting.
